

# DeepSol (DSL) - Official Whitepaper

Version: 1.0

Date: June 2025

---

## ♦ Introduction:

DeepSol (DSL) is a decentralized AI-powered project built on the Solana blockchain. Our mission is to enable fast, scalable, and low-cost infrastructure for AI models, predictions, and intelligent applications.

---

## ♦ Vision:

To create the leading decentralized AI ecosystem that empowers developers, researchers, and users with transparent and scalable tools on Solana.

---

## ♦ Token Details:

- Token Name: DeepSol
- Symbol: DSL
- Blockchain: Solana
- Total Supply: 10,000,000,000 DSL
- Initial Distribution:
  - 40% Community and Airdrops
  - 20% Development Team
  - 15% Strategic Partnerships
  - 15% Staking and Rewards
  - 10% Treasury
- Token Pair: DSL/USDT
- Contract Address: HRUc5sq9MQFUV1JKGe41j7yRqCfYoNtffhWTuRhPDNMp

---

## ♦ Utilities of DSL Token:

1.  Staking: Earn rewards for securing the network and holding DSL
2.  AI Execution Credits: Pay for AI model inference and compute cycles
3.  Governance: Vote on upgrades and future roadmap decisions
4.  Access: Premium features and early product access for holders

---

◆ Roadmap:

- Q2 2025 – Launch on Solana, Community Airdrop
- Q3 2025 – Launch Staking & Governance Portal
- Q4 2025 – Integrate AI Utility Dashboard
- Q1 2026 – Multi-chain support & prediction markets

---
